Garver Engineers Unveils New Corporate Name and Logo Modernizing corporate identity part of Garver's Era of Growth

LITTLE ROCK—March 16, 2009—Garver Engineers is introducing a new corporate name and logo that reinforces its commitment to creating new jobs and expanding client services.

The company has abbreviated its name to Garver and developed a new logo that reflects its 90-year history and expanding client markets.

“We are growing in both people and capabilities, adding services in-house that make sense for our clients,” said Brock Johnson, Garver president. “It is important to us that our simplified name and new logo express our pledge to provide high-quality services that our clients trust and value, a formula we have successfully used to grow our numbers and geographical reach. Although engineering continues to be the cornerstone of our business, we are evolving with new services that complement and enhance our business.”

Garver’s logo utilizes a simple shape reflective of engineering and construction—the square—and incorporates a capital “G” that doubles as a circular arrow. This arrow symbolizes Garver’s never-ending commitment to its clients, a business philosophy that is based on building relationships that last forever.

“Our new logo is inspired by our rich heritage and our founder, Neal Garver,” Johnson said. “Plus, the square is a basic building block and denotes strength, equality and integrity. We use this to define our new logo and reinforce our commitment to these qualities.”

Garver’s Era of Growth includes expanding and opening new offices, and the company is on track to reach 400 employees by 2011.

Garver offers a full range of engineering and complementary services, handling projects in fields such as transportation, water, aviation, industrial, federal, development, surveys, and construction management and observation.

Garver has offices in Little Rock, Fayetteville and Hot Springs, Ark., Tulsa and Norman, Okla., Florence and Huntsville, Ala., Brandon, Miss., Franklin, Tenn. and Frisco, Texas.

“We’re celebrating an important milestone this year—our 90th anniversary,” Johnson said. “We’re investing in resources that empower our employees to better meet our clients’ needs. By building upon our proven, foundational work, we are taking our business to a greater level of service.”
